

CORPORATE TELECOMMUNICATIONS SERVICE AGREEMENT

Client: LogisticsKZ

Corporate Account ID: CORP_003

Effective Period: January 2026 – December 2026

Section 1. General Terms

This Agreement is entered into between Beeline Kazakhstan JSC (the "Operator") and LogisticsKZ (the "Client") to govern the provision of mobile telecommunications services, including voice, messaging, and mobile data, across all corporate subscriber lines registered under the Client's corporate account. The Client agrees to abide by the Operator's acceptable use policy and all applicable telecommunications regulations of the Republic of Kazakhstan. The Operator warrants that services shall be delivered in accordance with industry-standard quality benchmarks.

Section 2. Service Continuity and Support

The Operator shall provide 24/7 technical support and shall maintain network availability of no less than 99.5% on a monthly basis. Scheduled maintenance windows are excluded from availability calculations. In the event of a service-impacting incident, the Operator shall notify the Client's designated technical contact within four (4) business hours and shall deliver a written root cause analysis within ten (10) business days of incident closure.

Section 3. Billing and Invoicing

Invoices shall be issued monthly in arrears and shall be payable within thirty (30) days of issuance. Disputes regarding any line item must be raised in writing within sixty (60) days of the invoice date. Payments not received within the agreed timeframe shall accrue interest at a rate of 0.05% per day. All amounts are denominated in Kazakhstani Tenge (KZT) unless otherwise stated.

Section 4. Negotiated Rates

Notwithstanding the Operator's standard published tariffs, the following negotiated rates shall apply to all subscriber lines under corporate account **CORP_003** for the duration of this Agreement:

(a) Negotiated overage rate: KZT 0.25 per MB. This rate replaces the standard tariff overage rate for all data usage under this corporate account and shall be applied to each subscriber line individually unless a pooled quota is specified below.

(b) Pooled data quota: 500 GB shared across all subscriber lines under this account. Usage exceeding the pooled quota shall be billed at the negotiated overage rate specified in (a). Individual lines shall not be assessed overage charges so long as total account usage remains within the pooled quota.

(c) Contract-specific zero-rated domains: logistics-fleet.kz. Traffic to these domains shall not be counted against the pooled quota and shall not incur charges, in addition to any zero-rated domains in the Operator's standard tariff (e.g. beeline.kz).

Section 5. Signatures
